

Specializing in Hard Maple and Birch

Located in Munising, Michigan, on the southern shore of Lake Superior, our Michigan Division manufactures a full range of hardwood lumber and veneer from timber harvested in Michigan, Wisconsin, Vermont, New York and Canada.

The specifications of the hardwood logs destined for our Michigan veneer plant are extremely demanding and precise, typically the first or second segment taken from the tree.

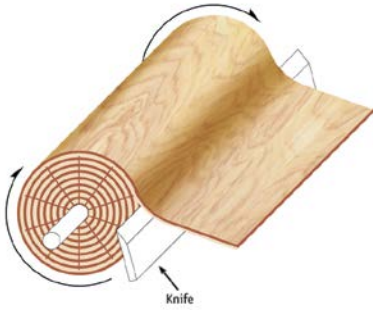

We have also invested heavily in the technology necessary to manufacture our veneers with the greatest possible efficiency, for the widest number of applications. Our new splicing/pressing technology has redefined the possible applications for spliced veneer.

Currently, our Michigan Division produces about 300,000 msf of hardwood veneer annually. Most of this veneer is used by hardwood stock panel producers for high-quality faces and backs for cabinetry and furniture. Other applications include door skins, curved and cut-to-size applications, wall panels, counter fronts, flooring, edgebanding and acoustical instruments.

Hardwood Veneer

Hardwood Veneer

Rotary Cut

Produces a multi-patterned grain veneer. The log is centered in the lathe and turned against a knife blade at a slight angle, like unwinding a roll of paper, following the log's annular growth rings.

Known as the "maple king" of the industry, the Hardwood Veneer Division of Timber Products Company is the top producer of the highest-quality rotary cut maple and other hardwood veneers.

As part of a fully integrated company, we can deliver an exceptional product for a wide range of applications, a tremendous resource for end-users and wholesale distributors alike.

Species

- Hard Maple
- Birch
- Red Oak
- Ash

Dimensions

- 4' x 8', 8' x 4', 10' x 3'
- Whole piece face in multiple dimensions
- 24" to 99" lengths
- 12" to 124" widths

Spliced-to-Size Applications

- Book matched
- Slip matched
- Pleasing matched
- Mismatched

Services

- Cut-to-size
- Export packaging
- Shipping via rail, trucks and vans

Timber Products Company is one of the nation's largest and most respected manufacturers of a comprehensive range of wood products.

As an independently owned, fully integrated company with dedicated manufacturing facilities in both the western and eastern United States, we

provide immediate access to a vast selection of products and services. We've implemented new technologies to make our operations more efficient and our products more cost-effective. We can respond to your needs faster, with greater flexibility and with an absolute assurance of quality.
